5

S2: Grid inside parsys cell

5

S3: Width container inside parsys cell

5

S4: Hero continuation body + width + grid

Scenario 1: Top-level container with width style + nested grid 5 examples

DESCRIPTION

An AEM container with a container-* width styleId that contains any grid anywhere in its subtree. Triggers collectCellLeaves() at emitNode() level. The whole container becomes a plain section; each grid inside becomes an inner-grid controller with col-N blocks.

CODE PATH

emitNode() → containerHasWidthStyle() && containerHasAnyGrid() → collectCellLeaves(node, blocks, 0, '')

EDS: section → [inner-grid {cols-X-Y,...widthClass}, block{col-1}, block{col-2}, ...]

#	AEM Page Path	JCR Container Node	Width Class	Note
1	/content/abbvie-com2/ar/es	container	container-xx-large	Top-level container 'container' (container-xx-large) contains a grid → page becomes a section with inner-grid blocks
2	/content/abbvie-com2/ar/es/join-us	container2	container-xx-large	Top-level container 'container2' (container-xx-large) contains a grid → page becomes a section with inner-grid blocks
3	/content/abbvie-com2/ar/es/join-us	container3	container-x-large	Top-level container 'container3' (container-x-large) contains a grid → page becomes a section with inner-grid blocks
4	/content/abbvie-com2/ar/es/join-us	container_829993285	container-xx-x-large	Top-level container 'container_829993285' (container-xxx-large) contains a grid → page becomes a section with inner-grid blocks
5	/content/abbvie-com2/ar/es/join-us/life-at-abbvie	container2	container-xx-large	Top-level container 'container2' (container-xx-large) contains a grid → page becomes a section with inner-grid blocks

Scenario 2: Grid inside a parsys cell (nested inner-grid)

5 examples

DESCRIPTION

A par_RC parsys node inside one grid that itself contains another AEM grid. collectCellLeaves() encounters isGrid() → calls emitInnerGrid(). Depth > 0 means column classes become ncol-N instead of col-N.

CODE PATH

collectCellLeaves() → isGrid(rt) → emitInnerGrid(child, out, depth+1) → blocks get ncol-N class

```
EDS: grid-section { children: [inner-grid {cols-X-Y}, block{ncol-1}, block{ncol-2}] }
```

#	AEM Page Path	Par Cell (contains inner grid)	Total Grids on Page	Note
1	/content/abbvie-com2/ar/es/join-us	par_13	6	Cell 'par_13' contains an inner grid. Total grids in page: 6
2	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/benefits	par_12	3	Cell 'par_12' contains an inner grid. Total grids in page: 3
3	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/learning-and-development	par_12	4	Cell 'par_12' contains an inner grid. Total grids in page: 4
4	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/well-being-in-the-workplace	par_12	5	Cell 'par_12' contains an inner grid. Total grids in page: 5
5	/content/abbvie-com2/ar/es/join-us/why-abbvie	par_12	7	Cell 'par_12' contains an inner grid. Total grids in page: 7

Scenario 3: Width-style container inside a parsys cell

5 examples

DESCRIPTION

A container-* node found inside a par_RC parsys cell. collectCellLeaves() sees isContainer(rt) + containerHasWidthStyle() → emits a cols-12,widthClass inner-grid controller. All container content becomes col-1 blocks.

CODE PATH

collectCellLeaves() → isContainer(rt) && containerHasWidthStyle(child) → emits cols-12,widthClass controller → content becomes col-1 blocks

```
EDS: grid-section { children: [inner-grid {cols-12,widthClass,col-1}, block{col-1}, ...] }
```

#	AEM Page Path	JCR Container Node	Width Class	Inside Par Cell	Note
1	/content/abbvie-com2/ar/es	container_829993285_	container-xxx-large	par_13	Container 'container_829993285_' (container-xxx-large) inside parsys cell 'par_13' contains a grid → emits cols-12,container-xxx-large inner-grid in that cell
2	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/learning-and-development	container_1199983605	container-medium	par_13	Container 'container_1199983605' (container-medium) inside parsys cell 'par_13' contains a grid → emits cols-12,container-medium inner-grid in that cell
3	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/well-being-in-the-workplace	container_675367643	container-medium	par_13	Container 'container_675367643' (container-medium) inside parsys cell 'par_13' contains a grid → emits cols-12,container-medium inner-grid in that cell
4	/content/abbvie-com2/ar/es/join-us/why-abbvie	container_195460670_	container-medium	par_13	Container 'container_195460670_' (container-medium) inside parsys cell 'par_13' contains a grid → emits cols-12,container-medium inner-grid in that cell
5	/content/abbvie-com2/ar/es/join-us/why-abbvie	container_829993285_	container-xxx-large	par_13	Container 'container_829993285_' (container-xxx-large) inside parsys cell 'par_13' contains a grid → emits cols-12,container-xxx-large inner-grid in that cell

Scenario 4: Hero continuation body: width-style container + grid

5 examples

DESCRIPTION

After a hero image container + overlap container merge, the body nodes may include a container-* with a grid. emitHeroContinuationSections() / hero body group logic emits a cols-12,widthClass inner-grid before calling collectCellLeaves() with col-1 assignment.

CODE PATH

aemToCanvas() hero merge → bodyGroups → emitHeroContinuationSections() or body group path → emits cols-12,widthClass inner-grid + col-1 assignment

EDS: section (after hero) → [inner-grid {cols-12,widthClass}, block{col-1}, ...]

#	AEM Page Path	JCR Container Node	Width Class	Note
1	/content/abbvie-com2/ar/es/join-us	container2	container-xx-large	Container 'container2' (container-xx-large) appears after hero container (backgroundImageReference) and contains a grid → emits inner-grid in the hero continuation body section
2	/content/abbvie-com2/ar/es/join-us/life-at-abbvie	container2	container-xx-large	Container 'container2' (container-xx-large) appears after hero container (backgroundImageReference) and contains a grid → emits inner-grid in the hero continuation body section
3	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/benefits	container2	container-xx-large	Container 'container2' (container-xx-large) appears after hero container (backgroundImageReference) and contains a grid → emits inner-grid in the hero continuation body section
4	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/employee-resource-groups	container2	container-xx-large	Container 'container2' (container-xx-large) appears after hero container (backgroundImageReference) and contains a grid → emits inner-grid in the hero continuation body section
5	/content/abbvie-com2/ar/es/join-us/life-at-abbvie/learning-and-development	container2	container-xx-large	Container 'container2' (container-xx-large) appears after hero container (backgroundImageReference) and contains a grid → emits inner-grid in the hero continuation body section
